INTRODUCTION

Thank you for investing in the Sonance | James Demo Board Kit! When strategically displayed in your showroom in context with the Sonance Design Gallery message, these boards will help demonstrate finishes and solutions for a variety of surface materials to intrigue your customers and guide their purchasing experience.

INSTALLATION

1. Sonance and James recommend displaying these demo boards in the format shown in Figure 1.
2. When possible, it is suggested that these displays have an iPad or touch display mounted to the left or right to drive the conversation and lead into the demo board to select finishes based on project design and needs.
